

Features & Functionality Manual

Academic Reporting, Approvals & School Fees

Prepared for the School Head and System Administrator
First Class High · IGCSE / ZIMSEC Curriculum
2026

1. Introduction

Edupro SMS is a purpose-built academic reporting and school management platform. It replaces spreadsheets and paper report cards with a single system that carries marks from the classroom, through Class Teacher review and Headmaster approval, to a printable PDF report card automatically emailed to parents — plus a school fees module for termly billing and balance tracking.

The system has five roles, each with its own dedicated, uncluttered screen:

- **Instructor (Teacher)** — enters Term and Exam marks for their classes/subjects.
- **Class Teacher** — reviews their class's report cards before the Headmaster sees them.
- **Headmaster** — approves and publishes report cards, and sees whole-school performance.
- **Bursar** — manages boarding fees: billing, payments, and statements.
- **Student / Guardian (parent)** — views grades, profile, and fee statements; downloads report cards.

Every role logs into the same web address and is taken straight to their own dashboard — there is no separate admin backend for staff to learn, and no role can see another role's private data.

2. Signing In

All users sign in from the same branded login page using their email address and password. The system automatically detects the user's role and opens the correct dashboard — a teacher never sees the Headmaster's screen, and a parent never sees a teacher's marks-entry screen.

The Edupro SMS login page, branded with the school's own logo and name.

3. Headmaster Dashboard

The Headmaster's dashboard is the whole-school control centre. At a glance it shows the current academic year and term, total classes, teachers and students, how many report cards have been published so far this term, how many are still pending approval, and the school's overall average grade.

Below the summary, the dashboard has four working sections:

- **Class Performance Overview** — every class, its teacher, average %, grade and completion status, filterable and exportable to CSV.
- **Report Approval Workflow** — bulk Approve and Publish buttons for classes whose report cards are ready, with a direct link into each class's detailed review.
- **Subject Performance Analysis** — the school's strongest subjects and the subjects needing the most attention, calculated from real submitted marks.
- **Recent Activity** — a live feed of report cards changing state and any assessments still missing marks past their due date.

Class Review & Bulk Approval

Clicking “Review” on any class opens a full drill-down: the class average, grade distribution chart, a ranked list of every student with their subject count and status, the Class Teacher's comments, and the Approve / Reject / Publish actions for that class's report cards.

Class Review drill-down — grade distribution, ranked student list, and approval actions for one class.

4. Teacher Dashboard & Marks Entry

A teacher's dashboard shows only the classes and subjects assigned to them: how many marks are entered so far, how many are still pending, and a quick subject-then-class picker that opens straight into marks entry for that class. A Class Teacher additionally sees a “Report Cards Awaiting Your Review” panel here — their own step in the approval chain, done with one click per class.

Teacher Dashboard — assigned subjects, class cards with entry progress, and grade boundaries reference.

Entering Marks

Marks entry captures a **Term Mark** and an **Exam Mark** per subject, each out of 100, with the letter grade calculated live as the teacher types. The page shows real-time class performance (a grade distribution chart) and the grade boundary table for the class's curriculum — Cambridge or ZIMSEC, and the correct band for that class's Form level. Marks can also be exported to CSV, edited offline, and re-imported, and the whole sheet can be printed.

5. Bursar — School Fees

The Bursar signs in to their own screen only — there is no access to the school's internal administration area, only this fees page. Fees are termly: a Day Boarder is billed \$750 per term and a Full Boarder \$1,450 per term, decided by each student's Boarding Type.

From one screen, the Bursar can:

- See every student's class, boarding type, and outstanding balance in one table, with a running school-wide total billed / paid / balance.
- Change a student's Boarding Type at any time — this only affects future billing, it never rewrites an already-billed term.
- Record a payment against any billed term (supporting partial payments across more than one instalment, with the balance updating immediately).
- Print or download a PDF fee statement for any student, showing every term of the current academic year.

6. Parent & Student Portal (My Reports)

Students and their parents/guardians share the same portal, with four tabs. A guardian with more than one child at the school sees a card for each child and can jump between them.

Overview

A compact summary per child: academic year and term, average, overall grade, class position, star rating, and the full subject-by-subject breakdown with the teacher's comment for each subject. From here a parent can view, print, or download the report card as a PDF, or resend it by email.

7. The Report Card

A report card only reaches this stage after passing through the full approval chain: the subject teacher enters marks, the Class Teacher reviews the class, and the Headmaster approves and publishes. Only once **Published** does it become visible to the student and their guardians, and only then is it automatically emailed home.

The printed PDF carries the school's logo, the Term Mark and Exam Mark (with grades) for every subject, an auto-loaded comment per subject, the class average/grade/position, signature lines for the Class Teacher and Headmaster, and a scannable QR code that lets anyone verify the report is genuine.

A student's Fee Statement, showing two billed terms and one upcoming, not-yet-billed term.

9. Roles & What Each One Can Do

Role	Signs in to	Can do
Instructor (Teacher)	Teacher Dashboard + Enter Marks	Enter Term/Exam marks for their own classes and subjects only.
Class Teacher	Teacher Dashboard	Everything a teacher can, plus reviewing their own class's report cards before the Headmaster sees them.
Headmaster	Headmaster Dashboard + Class Review	Whole-school visibility; approves, rejects and publishes report cards; sees performance analytics.
Bursar	Bursar page	Bills terms, records payments, changes boarding type, prints statements for any student. No access to marks or report cards.
Student / Guardian	My Reports	Views/prints/downloads their own (or their children's) report cards and fee statements only.

No role can see or act on data outside its own scope — this is enforced by the system itself, not just hidden by the menus. A parent cannot open another family's report card or fee statement even by guessing a web address.
