Bursar User Manual

First Class High School
A GREAT PLACE TO BE

Covers: Dashboard · Fees · Payments & Receipts · Batch Billing · Student Management · Reports
Version 1.0 · 11 July 2026

TIP: This manual is text-only by design — every screen, field, button and workflow below was walked through and verified live in the system while writing this guide, using the actual Bursar account. Field names, button labels and menu items match exactly what you will see on screen.

Contents

1. Getting Started

2. Dashboard

3. Fees

4. Recording Payments & Receipts

5. Batch Billing

6. Student Management

7. Reports

8. Quick Reference

9. Troubleshooting & Notes

1. Getting Started

The Bursar portal is a web application. No installation is required — you only need a web browser (Chrome, Edge, or similar) and the school's login address.

Logging in

Web address	http://192.168.1.100:8080/bursar (on the school network), or the address given to you by IT.
Username	Your Bursar email address, e.g. bursar@firstclasshigh.ac.zw
Password	See the separate <i>Staff Login Credentials</i> document issued by the Headmaster/Administrator. Change your password after your first login if you have not already done so.

1. Open your browser and go to the login address above.
2. Enter your email address and password.
3. Click **Login**.
4. You will land on the **Dashboard** (the Bursar home page).

TIP: If you forget your password, use the **Forgot Password?** link on the login page, or ask the Headmaster/Administrator to reset it for you.

Navigating the portal

Every page shares the same layout: your content is on the left, and a navigation panel is on the right showing the school name, your account, and five menu links:

Dashboard	Overview of all students, balances, and quick payment entry.
Fees	Full, searchable list of every fee record (one row per student per term).
Billing	Batch-create fees for an entire term in one action.
Students	Add new students, enroll them, link guardians, deactivate records.
Reports	Fee collection summary, outstanding balances, and payment history, each exportable to CSV.

Click **Log out** at the bottom of the navigation panel when you are done, especially on a shared computer.

2. Dashboard

The Dashboard (/bur sar) is your home page. It gives you a school-wide snapshot and lets you handle the two most common tasks — changing a boarding type and recording a payment — without leaving the page.

Summary cards

Four cards at the top show live totals across the whole school: total number of students, total amount billed, total amount paid, and total outstanding balance. These update automatically as fees are billed and payments are recorded.

The student list

Below the summary cards is a table of every active student, showing their class, name, boarding type, and current balance. Use the **Filter by name or class...** search box above the table to narrow the list — it filters instantly as you type.

Changing a student's boarding type

Each row has a **Boarding Type** dropdown showing *Day Boarder* or *Full Boarder*.

1. Find the student (use the filter box if needed).
2. Click the Boarding Type dropdown on their row and select the new value.
3. The change saves automatically — no separate Save button. A confirmation message ("Boarding type updated.") appears near the top of the page.

TIP: Changing boarding type here only changes the setting on the student's record. It does **not** retroactively change the amount on fees that have already been billed. If a student's boarding type changes mid-term, bill any new/future term after the change so the new rate applies (see Section 5, Batch Billing).

Recording a payment from the Dashboard

1. Find the student's row and click **Record Payment**.
2. A panel expands beneath the row showing every billed term for that student, each with its Amount, Paid-so-far, and Balance.
3. Type the amount received into the **Amount** box next to the correct term.
4. Click **Record**.
5. The Paid and Balance columns update immediately, a payment receipt PDF opens automatically in a new browser tab (see Section 4), and the page refreshes shortly after.

Click **Statement** on a student's row at any time to open their full, official Fee Statement as a PDF (see Section 4 for what it contains).

3. Fees

The Fees page (/bursar_fees) lists every individual fee record in the system — one row per student per billed term — and is the place to go when you need to find one specific fee quickly, adjust an amount, or review payment status in bulk.

Searching and filtering

Four controls sit above the table:

Search by student name	Type any part of a student's name.
All Boarding Types	Filter to Day Boarder or Full Boarder only.
All Status	Filter to Billed, Partially Paid, or Paid.
All Terms	Filter to a specific academic term.

Click **Reset Filters** to clear all four and return to the full list. The count above the table (e.g. "Showing 20 of 67 fees") always reflects your current filters.

Managing a fee

Click **Manage** on any row to expand a panel with two independent tools:

Record Payment

Enter an amount in the **Amount Paid** box and click **Record**. This works exactly like the Dashboard's payment panel (Section 4) and also opens a receipt PDF automatically.

Adjust Fee Amount

Change the **New Amount** field and click **Save** to correct the total billed amount on that specific fee — for example, to apply a discount, scholarship, or fix a billing error.

TIP: Adjusting the fee amount changes what the student owes in total; it is separate from recording a payment. Use it sparingly and only for genuine corrections — it directly affects the student's official balance.

Click **Statement** on any row to print that student's Fee Statement (see Section 4).

4. Recording Payments & Receipts

You can record a payment from two places — the Dashboard (Section 2) or the Fees page (Section 3) — and both behave identically.

What happens when you record a payment

1. The amount you enter is added to that fee's "paid" total.
2. The balance recalculates automatically (Amount Billed – Total Paid).
3. The fee's status updates: **Billed** → **Partially Paid** → **Paid** once the balance reaches zero.
4. A transaction is written to the student's permanent Fee Ledger (this is what powers the Fee Statement and the Payment History report).
5. A **Payment Receipt** PDF opens automatically in a new browser tab.

TIP: Your browser may block the receipt tab as a "pop-up" the first time. If nothing opens, look for a pop-up blocked notification near the address bar and choose **Always allow** for this site.

The Payment Receipt

The receipt is an official, printable document. It shows:

School header (logo, name, address, contact details) and an "Official Receipt" badge

Receipt number, date and time

Student name and class

The amount received for this transaction

A summary box: term, total billed, total paid to date, and balance remaining

Signature lines for Bursar and a Parent/Guardian copy line

1. Use your browser's print function (or the **Print** link at the top right of the receipt page) to print a physical copy for the parent/guardian.
2. Use the **Get PDF** link at the top right to download/save the receipt as a PDF file.

Fee Statements

Click **Statement** next to any student (on the Dashboard or the Fees page) to open their full Fee Statement — a running ledger of every bill and payment for that student, in date order, with a closing balance. This is the document to give a parent who wants a full account history, not just a single receipt.

TIP: A Fee Statement always reflects the very latest data — there is nothing to refresh or regenerate. Every payment you record appears on it immediately.

5. Batch Billing

The Billing page (/bursar_billing) creates fees for many students at once — typically all active students — at the start of a new term, instead of billing each student one by one.

Current rates are always shown on this page (e.g. "Day Boarder: \$750.00/term, Full Boarder: \$1,450.00/term").

How to run a batch billing

1. Select the **Academic Term** you want to bill for.
2. Choose a **Boarding Type Filter**: All Boarding Types, Day Boarder Only, or Full Boarder Only.
3. Click **Preview Billing** first. This is completely safe and creates nothing — it shows you how many students will be billed, the total amount, how many are already billed for that term (and will be skipped), and a sample of the students and amounts.
4. Review the preview carefully.
5. When you are satisfied it is correct, click **Create Fees** to actually create the fee records.
6. A confirmation shows how many fees were created and how many were skipped (students already billed for that term are always skipped automatically — batch billing never double-bills someone).

IMPORTANT: **Create Fees** is the one action on this page that writes real data and cannot be casually undone. Always run **Preview Billing** first and check the numbers before clicking **Create Fees**.

Because already-billed students are automatically skipped, it is safe to re-run batch billing later in the term to pick up any newly-added students without affecting anyone already billed.

6. Student Management

The Students page (/bursar-students) is where you add new students, enroll them into a program/class, link them to a guardian, and deactivate records that are no longer active.

Finding students

Search by name or email, and filter by status (Active/Inactive) and boarding type, exactly as on the Fees page. The total student count is shown above the table.

Adding a new student

Click **Add Student** at the top of the page. Fill in the form:

Student Name *	Full name (First Last).
Email *	Must be unique and a valid email format. This becomes the student's portal login.
Admission Number *	Unique student ID, e.g. STU2026001.
Date of Birth	Optional. Format YYYY-MM-DD.
Gender *	Select from the dropdown.
Boarding Type *	Day Boarder or Full Boarder.
Program (Optional)	Can be left blank and added later during enrollment.
Class / Student Group (Optional)	Can also be left blank and added later.

Click **Create Student** to save, or **Cancel** to discard. After creating a student you can enroll them in a program, link a guardian, and bill them — see below and Section 5.

Managing an existing student

Click **Manage** on any student's row to open a detail panel with three tools:

Enroll in Program

1. Select a **Program** (required) and, optionally, a **Class**.
2. If the program has elective subject groups (e.g. Practical, Arts electives), a dropdown appears for each group — choose one subject per group. If a student genuinely takes no Practical subject, select "None" rather than leaving it blank.
3. Click **Enroll**.

Link Guardian

Either:

- Choose an **Existing Guardian** from the dropdown and click **Link Existing**, or
- Enter a **Guardian Name** and **Guardian Email** and click **Create & Link** to create a brand-new guardian record and link it in one step.

TIP: Linking a guardian is what allows a parent to receive report cards by email and log into the parent portal. A student with no guardian linked cannot be reached automatically.

Deactivate

Enter an optional reason (e.g. "Graduated", "Transferred") and click **Deactivate Student**. Use this instead of deleting a record — it preserves the student's full history while removing them from active lists and billing.

The **Bulk Import** button at the top of the Students page opens a separate tool for importing many students at once from a spreadsheet, for large intakes such as a new academic year.

7. Reports

The Reports page (/bursar-reports) has three tabs, each with its own filters, a **Refresh** button, and an **Export CSV** button so you can open the data in Excel.

Fee Collection Summary

The default tab. Filter by academic term (or view all terms). Shows total billed, total collected, total outstanding, and an overall collection rate percentage, followed by a breakdown by class showing student count, billed, collected and outstanding per class. Use this for a school-wide financial overview, or to spot which classes have the weakest collection rate.

Outstanding Balances

A full list of every student with a balance still owing, sorted with the largest balance first. Each row shows student, class, boarding type, term, balance, due date, and (where on file) guardian name and contact details. Use this as your follow-up/collections list.

Payment History

A full transaction log of every payment ever recorded, most recent first, with receipt number, student, class, term and amount. Filter by a date range using the two date pickers. Use this to reconcile takings for a specific day or period, or to look up a specific receipt number.

Exporting to CSV

1. Apply any filters you want first.
2. Click **Export CSV**.
3. A file downloads to your computer's Downloads folder (e.g. outstanding-balances.csv) which opens directly in Excel or Google Sheets.

8. Quick Reference

I need to...	Go to	Do this
Take a payment from a parent	Dashboard or Fees	Find the student → Record Payment / Manage → enter amount → Record
Print a receipt for a payment just made	(automatic)	Opens automatically in a new tab — use Print or Get PDF on that page
Print a full account history for a parent	Dashboard or Fees	Click Statement next to the student
Change Day Boarder ↔ Full Boarder	Dashboard	Change the Boarding Type dropdown on the student's row
Bill an entire term at once	Billing	Select term → Preview Billing → check numbers → Create Fees
Correct a wrong fee amount	Fees	Manage → Adjust Fee Amount → enter New Amount → Save
Add a brand-new student	Students	Add Student → fill form → Create Student
Enroll a student in electives	Students	Manage → Enroll in Program → choose Program & electives → Enroll
Link a parent/guardian to a student	Students	Manage → Link Guardian → existing or new → Link
Remove a student who has left	Students	Manage → Deactivate → (optional reason) → Deactivate Student
See who still owes money	Reports	Outstanding Balances tab
See how much has been collected overall	Reports	Fee Collection Summary tab
Look up a past payment/receipt	Reports	Payment History tab — filter by date if needed
Get data into Excel	Reports (any tab)	Export CSV

9. Troubleshooting & Notes

Receipt or Statement PDF didn't open

Check for a pop-up-blocked notification near your browser's address bar and allow pop-ups for this site. You can always reopen it afterwards by clicking Statement again, or by finding the payment in Reports → Payment History.

A student's balance looks wrong

Open their Fee Statement (Statement button) — it lists every bill and payment in order, which is the most reliable way to see exactly how the current balance was reached. If a fee amount itself was entered incorrectly, correct it via Fees → Manage → Adjust Fee Amount.

Guardian / Contact columns show "-" in Outstanding Balances

This means no guardian has been linked to that student yet, not a fault in the report. Go to Students → Manage → Link Guardian to add one; the contact details will then appear.

"You do not have permission" errors

If you ever see a permission error while using a normal Bursar feature, note exactly what you were doing and contact the System Administrator — it usually means a role permission needs to be granted, which is a quick fix on the administration side, not something you can resolve yourself.

General good practice

- Always run **Preview Billing** before **Create Fees** when batch billing.
- Use **Deactivate** rather than trying to delete a student who has left — it keeps their financial history intact.
- Double-check the amount before clicking **Record** on a payment — there is no separate confirmation step.
- Export CSV reports regularly if you keep an offline copy of collections data for your own records.
